## Response to Arguments

1. Applicant's arguments, see Remarks, filed 6/6/2007, with respect to claims 1 and 5-9 have been fully considered and are persuasive. The rejections of claims 1 and 5-9 have been withdrawn.

## Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Claims 1-5 and 7-9 are allowable over prior art references because related references do not disclose a decoding method comprising generation of 3-bit decision data directly from computer coordinate values output from a demodulator using a phase difference (claims 5 and 9), viterbi decoding the 3-bit decision data to generate 1-bit data, re-encoding the 1-bit data, quantizing demodulated I channel and Q channel information based on coordination values from the demodulator, time delaying the quantized data until re-encoding in finished, and decoding the quantized data using the re-encoded data

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Abbaszadeh et al. (U. S. Patent No. 6, 370, 201) and McCallister et al. (U. S. Patent No. 5, 995, 551) disclose pragmatic trellis decoders.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Curtis B. Odom whose telephone number is 571-272-3046. The examiner can normally be reached on Monday- Friday, 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
